SUMMARY:

Final-year BCA student with strong Python programming skills and a basic understanding of AI and Machine Learning. Experienced in problem-solving and data handling, with hands-on practice through academic projects. Seeking an entry-level Python or software role with opportunities to grow in A

TECHNICAL COMPETENCIES:

- *Programming Languages:*
Python | SQL
 - *Data Science & ML Tools:*
NumPy | Pandas | Matplotlib | Seaborn | Scikit-learn (Basics) | ML Fundamentals
 - *Databases & Reporting:*
MySQL | Data Visualization (Basic)
-

EDUCATION:

- Bachelors of Computer Applications | Chandigarh University, Gharuan
Session: 2023-2026 | Score: 7.40 CGPA
 - Intermediate (BSEB) | S.SEC.+2 School, Bihar,Sasaram Session: 2021-2023
| Percentage: 58%
 - Matriculation (CBSE) | St Paul's School ,Bihar,Sasaram Session: 2020-2021 |
Percentage: 61%
-

TRAINING/PROJECT:

- **Under Department of Career Planning & Development(DCPD):** Completed 1-year structured training program focused on enhancing professional and technical skills. Gained exposure to corporate readiness modules, including communication skills, aptitude, soft skills, and personality development. Participated in mock interviews, group discussions, and industry sessions, improving problem-solving and analytical abilities.
 - **Project Title : House Rent Prediction System :** Developed a Flask web app with PostgreSQL backend; built a Random Forest Regressor model ($R^2 = 0.74$) using feature engineering & log transformation; implemented secure authentication with Bcrypt and an Admin Dashboard with CSV export.

-

EXPERIENCE:

- **Python & Machine Learning Intern (Online)**
SkillCraft Technology | 1 Month | 2025
 - Strengthened Python programming skills through practical tasks
 - Learned fundamentals of Machine Learning and data handling
 - Implemented basic ML models using Scikit-learn
 - Improved problem-solving and analytical thinking
-

LANGUAGES:

- English | Hindi
